Phillips Kirk Labor, MD

Eye Consultants of Texas, located in Grapevine is a full-service center that is noted for its complete and modern facilities for vision care including LASIK surgery. The services available at the new center are designed with the ease of the patient and family members foremost.

([NewsWire.net](http://www.newswire.net) – July 11, 2013) Grapevine, Texas -- Eye Consultants of Texas and Royce Labor are excited to announce a range of up-to-the-minute facilities and techniques located in the new and completely equipped Lasik Surgery Center. The facility is sited in Grapevine and offers a multiple vision benefits.

According to Royce Labor, "With the tools and skills inherent in the knowledgeable staff, numerous procedures can be performed on those with vision issues. These include ophthalmologic care, contact lens of the implanted types, cataract removal, keratoplasty techniques or procedures and lens implants. In addition, the standard office visits, examinations and testing are available."

"Dr. Kirk Labor, the founder of the practice, has office locations in Fort Worth, as well as Grapevine" he continues. "The doctor has been noted for his expertise and work in refractive surgical procedures. He has pioneered many of the technology tools which are able to measure the quality of vision while the cataract surgery is completed. He has also worked with the Ziemer surgical laser and implantable intraocular lens or iLASIK."

Precise accuracy is crucial in order to obtain the best results. In fact, most of those who undergo the procedure are able to report 20/20 vision after completion of the procedure.

The facility itself is attractive and comfortable. While the physical surroundings are important, it is also important to be assured of answers to all the questions. **LASIK** is a huge decision so it is important to be informed concerning the benefits and the risks.
